

Dear King County Executive Constantine:

Thank you for working to create more shelter, housing, and services for people who are homeless across King County. I support local government responding to the emergency of homelessness with real answers to the question “*where can people go?*” We all know that answers include better access to health care, including treatment options; harm reduction services; and investments in community health and safety. People who are homeless need housing. When housing is not available, people need shelter, stability, and respect. Providing meals, reasonable hours, & supportive services at all shelters is smart.

During the January 2016 One Night Count, volunteers saw 315 people in Southwest King County (including White Center and nearby communities) **sleeping outside overnight, after shelters were full.** *The number of people homeless in White Center more than doubled.* We need shelter & housing now.

**I support health, safety, and respect for ALL neighbors and neighborhoods.
I am glad to support the opening of shelter in White Center!**

A personal note: I support opening additional shelter in King County, including in White Center, because...

Sincerely,

Name
