

Hepatitis A

HEALTH WARNING FOR PEOPLE LIVING HOMELESS (South King County)

WHAT IS HEPATITIS A?

Hepatitis A (hep A) is a virus that spreads easily. Many people don't know they have hep A so they spread it without knowing.

It can cause severe liver disease that can last for months.

Sometimes people die from hep A.

Hep A has been spreading in people living homeless in the U.S.

HOW DOES IT SPREAD?

Hep A is in the poop of someone with hep A. If they haven't washed their hands after using the toilet, tiny bits of poop can get on things they touch. Hep A spreads from:

Touching objects or eating food that someone with hep A handled

Having sex with someone who has hep A

Sharing needles, pipes, or other items to take drugs

Wash your hands with soap and water after using the toilet, and before you cook or eat! Soap and water work best, but if they aren't available, use alcohol-based hand gel.

HOW CAN YOU PREVENT HEPATITIS A?

Don't share food, drinks, needles, or smokes with other people

Don't have sex with someone who has hep A

Use your own towels, toothbrush and utensils

Get 2 shots of hep A vaccine

SYMPTOMS OF HEPATITIS A

Fever

Fatigue

Vomiting

No appetite

Jaundice
(yellow eyes
& skin)

Dark pee,
pale poop,
diarrhea

Some people with hep A don't have any symptoms

If you think you might have hep A, see your doctor or go to the hospital

YOU CAN PROTECT YOURSELF FROM HEPATITIS A
